Bikaner, Rajasthan, India

SUMMARY

Final-year Computer Science undergraduate at Bikaner Technical University with hands-on experience in data analytics, machine learning, full-stack web development, and government-scale data operations. Audited 10,000+ records in a live government system, automated workflows cutting manual effort by 40%, built two AI-driven platforms solving real-world problems, and authored a hybrid deep learning research paper under preparation for journal submission. Seeking opportunities in Data Science, Machine Learning, or Software Engineering to apply end-to-end technical skills to meaningful challenges.

TECHNICAL SKILLS

Languages: Python, SQL, Core Java, C

ML & AI: Scikit-learn, Random Forest, Naive Bayes, NLP, TF-IDF, ARIMA, Deep Learning (MARN), Feature Engineering, Model Evaluation (MAE, RMSE)

Data & Analytics: Pandas, NumPy, Exploratory Data Analysis, Data Validation, Statistical Analysis, Data Modelling, MS Excel (Advanced), Matplotlib, Seaborn

Web & Backend: Django, REST APIs, Full-Stack Development

Tools & Platforms: Git, Jupyter Notebook, Google Colab, Oracle Cloud, VS Code, MS Office Suite

Concepts: SDLC, OOP, Agile, Problem Solving, Cross-functional Collaboration, Technical Documentation

EXPERIENCE

Informatics Analyst Intern

May 2024 – June 2024

Government of Rajasthan

Rajasthan, India

- Audited and validated 10,000+ citizen records across statewide government systems – identified data discrepancies and ensured 100% data quality compliance before reporting.
- Automated Excel-based reporting workflows using Python scripts and macros, reducing manual effort by 40% and delivering structured dashboards to senior stakeholders on time.
- Collaborated with cross-functional departments to produce analytical insights supporting operational decision-making – zero missed SLAs, zero complaints.

Data & Operations Coordinator

Apr 2023 – Present

Bikaner Technical University (BTU)

Bikaner, India

- Built and maintained Excel dashboards and version-controlled databases for large-scale technical events; delivered post-event analytical reports with actionable insights.
- Coordinated with internal teams on planning, logistics, and documentation – consistently on-time across all event cycles.

PROJECTS

JanSahay – AI Governance Intelligence System – Python, NLP, TF-IDF, Multinomial Naive Bayes, Random Forest

2024

- Built an AI-driven grievance redressal platform – automated classification using TF-IDF + Naive Bayes, priority scoring via heuristic engine, and welfare scheme recommendations using Random Forest.
- Designed a real-time analytics dashboard for government administrators – visualized case volumes, AI priority scores, and resolution trends to support data-driven decision-making.
- Reduced administrative response latency significantly by automating end-to-end grievance routing on real government operational data.

AI Weather Forecasting Web App – Python, Django, Random Forest, REST APIs, Feature Engineering

2024

- Developed a full-stack ML web application – applied feature engineering on historical weather datasets, integrated real-time APIs, and built interactive visualization dashboards.
- Automated data ingestion and preprocessing pipeline, cutting manual processing by 35%; followed complete SDLC from design through testing and deployment.

RESEARCH

Hybrid ARIMA + MARN Model for Weather Forecasting – Python, ARIMA, Deep Learning, Statistical Modelling

2024 – Present

- Designed a hybrid predictive system combining ARIMA (linear trends) and MARN deep learning (non-linear patterns) on multi-parameter environmental datasets (temperature, humidity, pressure).
- Hybrid model outperformed traditional baselines on MAE and RMSE metrics – targets real-time agricultural disease detection and early farmer decision support.
- Manuscript under preparation for peer-reviewed journal submission.

EDUCATION

Bikaner Technical University (BTU)

Bikaner, Rajasthan

B.Tech – Computer Science Engineering – CGPA: 7.61 / 10 (7 of 8 semesters completed)

June 2022 – May 2026

- Relevant Coursework: Data Structures & Algorithms, OOP, DBMS, Machine Learning, Operating Systems, Computer Networks, Software Engineering

CERTIFICATIONS

Oracle Cloud Infrastructure 2025 – AI Foundations Associate (Oracle, 2025) | Career Essentials in Data Analysis (Microsoft & LinkedIn, 2024)

Exploratory Data Analysis – Level 2 AI Ready | Yuva AI for All (NASSCOM / Govt. of India) | Project Management Skills for Leaders
